United Helpers is a nonprofit organization that provides aid to people after natural disasters. Based on the following brief description of operations, create an appropriate fully labeled Crow’s Foot ERD representing a set of relations that are each normalized to 3NF.

- Individuals volunteer their time to carry out the tasks of the organization. For each volunteer, their ID, name, address, and telephone number are tracked, and they are assigned one task at a time. United Helpers keeps track of both the ID and description of each task that the volunteer is assigned to, as well as when the volunteer started and finished their work on it.

- United Helpers also has a separate list of their different Chapters, for which they record the Chapter ID, name, and location. Each volunteer is assigned to exactly one Chapter and each Chapter has one or more volunteers participating in its activities.
